

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	21 August 2026
Name	SUJATHA MENDU
Project Name	Automated Network request Management
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Profile Management	User can view and update profile information Change password Manage communication preferences
FR-4	Login and Access	User can login with registered credentials Secure authentication and authorization Password reset functionality
FR-5	Notifications and Alerts	Send email notifications for important updates Send OTP for verification and confirmations
FR-6	Security and Data Protection	Secure storage of user data Data encryption and privacy compliance

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system should provide a simple and user-friendly Service Catalog interface for submitting network requests with minimal user effort.
NFR-2	Security	Only authorized users should be able to access the catalog, approvals, and backend records using role-based access control.
NFR-3	Reliability	The system should consistently process requests, approvals, notifications, and database updates without failure.
NFR-4	Performance	The workflow should process requests and send notifications promptly to minimize request turnaround time.
NFR-5	Availability	The network request service should be available to users whenever the ServiceNow platform is operational.
NFR-6	Scalability	The system should support an increasing number of network requests and users without affecting overall performance.
